

YOKO

XC-Ski poles • Fall / Winter 2011–2012

YOKO POLE LINE

YOKO pole line is based on the most advanced materials and technology available on the market. We have developed a line of YOKO XC-Skiing poles that are high quality and suitable for all types of XC-Skiers at different levels of doing XC-Skiing. When only the very best will do, then there can be no compromise on quality!

YOKO COMPOSITE SHAFTS

The lightest of YOKO Composite shafts are made out of 100 % carbon fiber (HM or HS). As an advantage we can deliver poles that are very light in weight and have really good balance properties.

8100 series

For high-level / racing, we recommend YOKO 8100 series poles which has shafts built using a carbon fiber that ensures high stiffness properties (High Modulus Carbon Fiber). Weight, stiffness and balance are optimal in HM 100 % composite shafts.

7100 series

Our 7100 series pole shafts are somewhat heavier than used for our 8100 series. The advantage with our 7100 series poles is that they are more resistant to impact, due to fact that 7100 series shafts are made using (HS carbon fiber). Our 7100 series is not as stiff as 8100 series but the two are very similar in balance properties and both series are very suitable for high-level of XC-Skiing.

6700 / 5400 / 4200 series

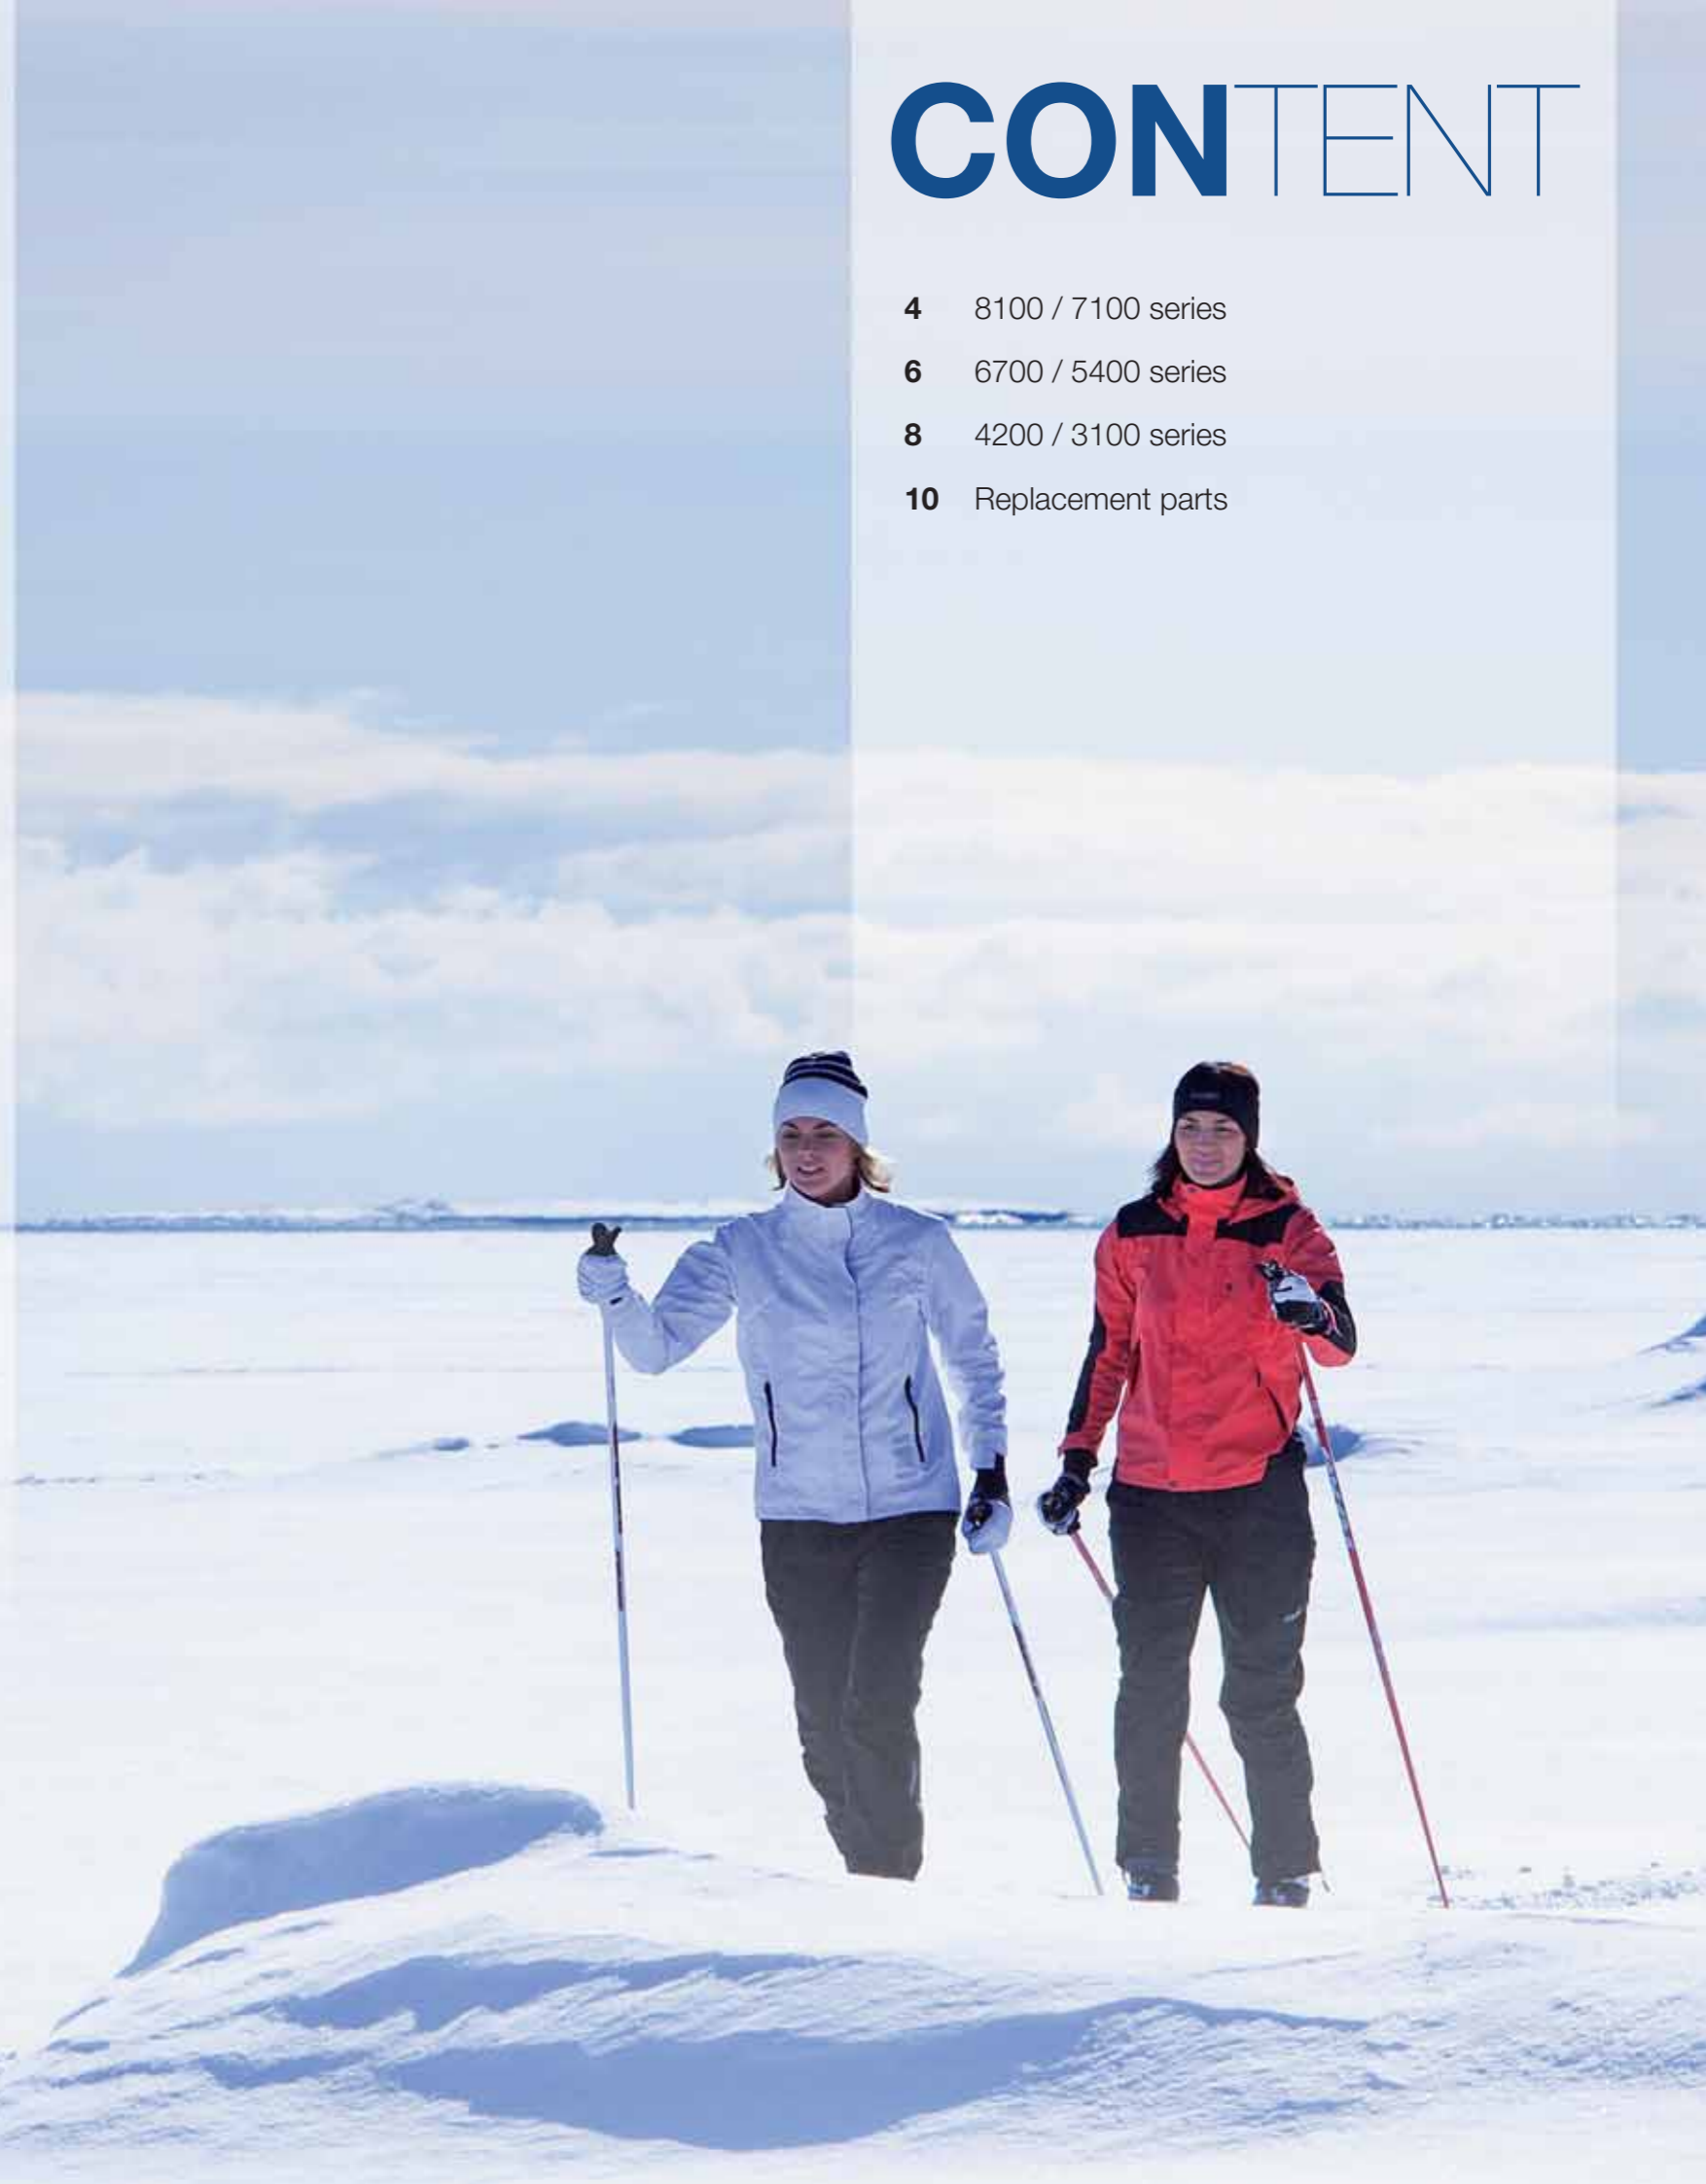

By replacing some of the carbon fiber with fiberglass has an advantage of increasing ruggedness. Although our 6700, 5400 and 5200 series poles are all made out of strong and durable shafts, the additional weight reduces the balance properties compared to 8100 and 7100 series poles. Due to this fact we suggest our 6700 series / 5400 series / 4200 series to be used by XC-Skiing enthusiasts who love the sport of XC-Skiing and want to use high quality poles that are almost as light weight as our top poles, but can take some more hits without breaking when enjoying XC-Skiing.

3100 series

Our entry level pole is our 3100 series pole which is made using finest fiberglass available in the market. With our 3100 series poles our customer gets a strong and easy to operate partner for sport of XC-Ski.

XC-SKI POLES XC-SKI POLES XC-SKI POLES

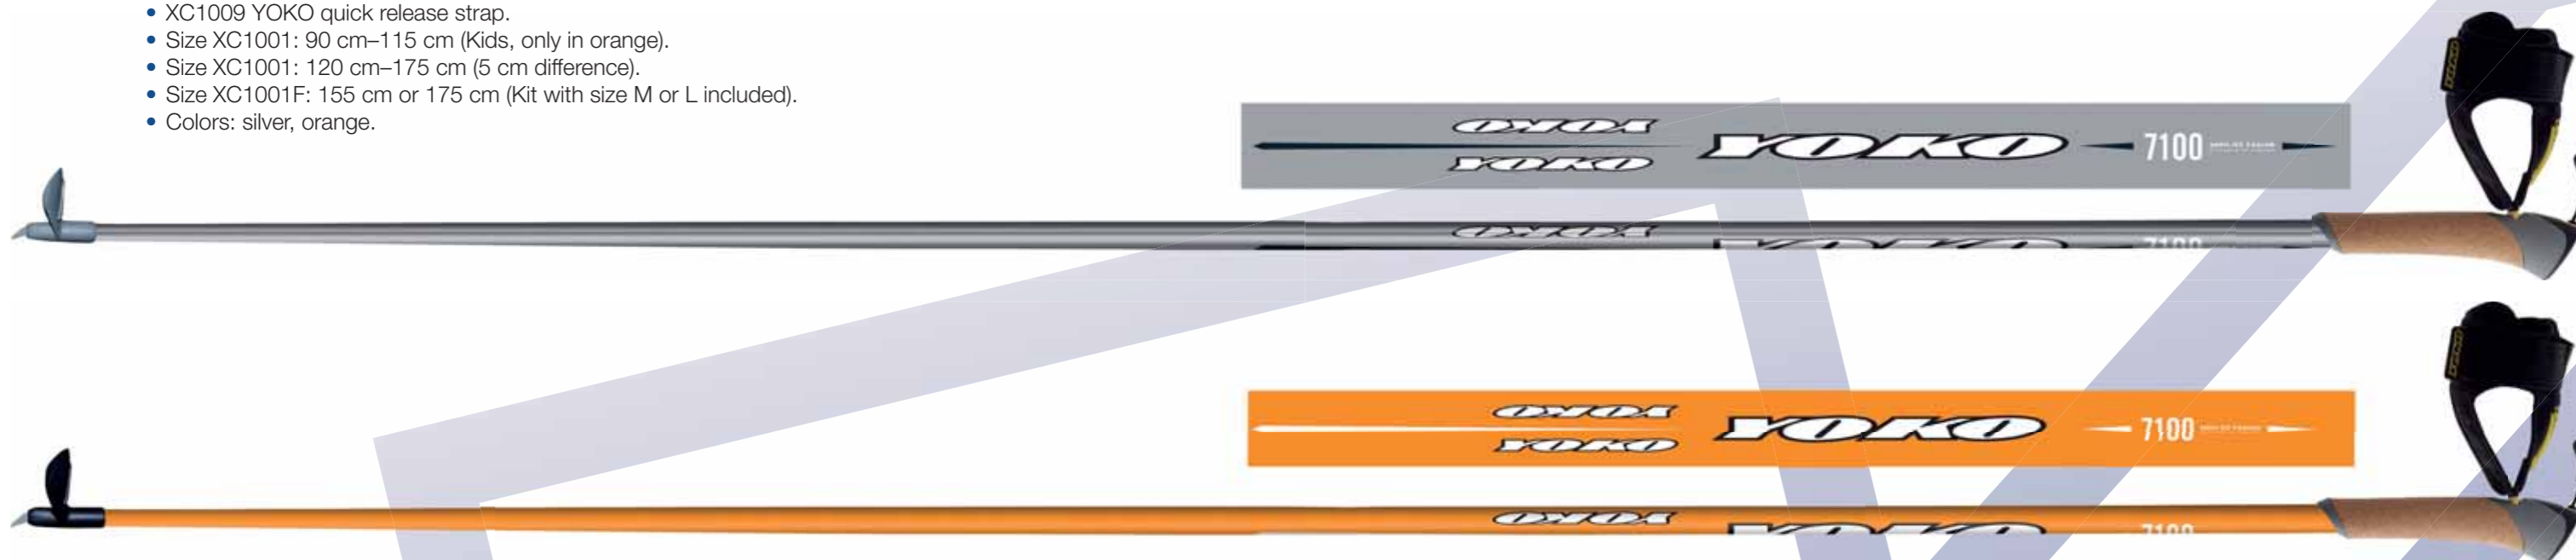

XC1000 / XC1000F > YOKO 8100 SERIES

- 100 % HS carbon pole.
- XC1007 YOKO quick release grip.
- XC1010 YOKO 001 basket (7 mm).
- XC1009 YOKO quick release strap.
- Size XC1001: 120 cm–175 cm (5 cm difference).
- Size XC1001F: 155 cm or 175 cm (Kit with size M or L included).
- Colors: gold, red.

XC1001 / XC1001F > YOKO 7100 SERIES

- 100 % HS carbon pole.
- XC1007 YOKO quick release grip.
- XC1012 YOKO 003 basket (10 mm).
- XC1009 YOKO quick release strap.
- Size XC1001: 90 cm–115 cm (Kids, only in orange).
- Size XC1001: 120 cm–175 cm (5 cm difference).
- Size XC1001F: 155 cm or 175 cm (Kit with size M or L included).
- Colors: silver, orange.

XC-SKI POLES XC-SKI POLES XC-SKI POLES

XC1002 / XC1002F > YOKO 6700 SERIES

- 70 % HS carbon pole.
- XC1007 YOKO quick release grip.
- XC1012 YOKO 003 basket (10 mm).
- XC1009 YOKO quick release strap.
- Size XC1001: 120 cm–175 cm (5 cm difference).
- Size XC1001F: 155 cm or 175 cm (Kit with size M or L included).
- Color: graphite, grey.

XC1003 / XC1003F > YOKO 5400 SERIES

- 40 % HS carbon pole.
- XC1007 YOKO quick release grip.
- XC1012 YOKO 003 basket (10 mm).
- XC1009 YOKO quick release strap.
- Size XC1001: 120 cm–175 cm (5 cm difference).
- Size XC1001F: 155 cm or 175 cm (Kit with size M or L included).
- Color: graphite, grey.

XC-SKI POLES XC-SKI POLES XC-SKI POLES

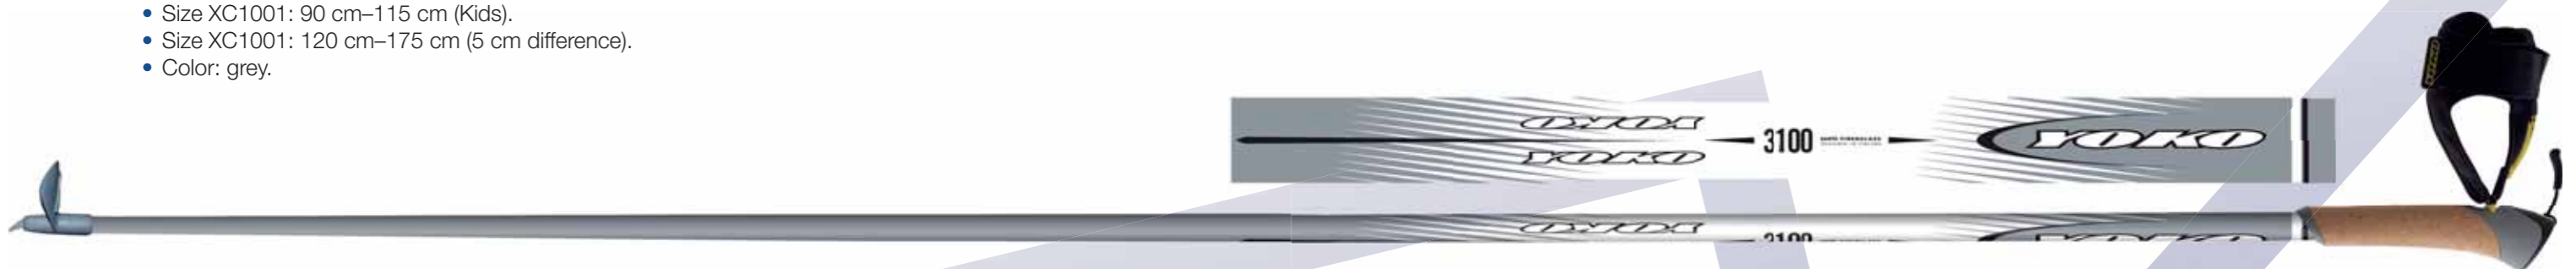

XC1004 > YOKO 4200 SERIES

- 20 % HS carbon pole.
- XC1007 YOKO quick release grip.
- XC1012 YOKO 003 basket (10 mm).
- XC1009 YOKO quick release strap.
- Size XC1001: 120 cm–175 cm (5 cm difference).
- Color: graphite, grey.

XC1005 > YOKO 3100 SERIES

- 100 % fiberglass pole.
- XC1007 YOKO quick release grip.
- XC1012 YOKO 003 basket (10 mm).
- XC1009 YOKO quick release strap.
- Size XC1001: 90 cm–115 cm (Kids).
- Size XC1001: 120 cm–175 cm (5 cm difference).
- Color: grey.
